CSB No.: 2017-02
Title: QUIKLOOK QLUtilitySensor Documentation Updates
Affected Products: QUIKLOOK FS 2016.236, 2016.343, 2016.365

Issue Description:

The software program QLUtilitySensor.exe is a sub-component of the QUIKLOOK software package used by some utilities as an M&TE database. QLUtilitySensor 2016.236, the most recent version, was released with QUIKLOOK 2016.236, 2016.343, and 2016.365. The documentation for these QUIKLOOK software packages have been sent out referencing a previous V&V of QLUtilitySensor.

Reconciliation:

The QLUtilitySensor V&V manual was updated to revision 12 to show the V&V results for QLUtilitySensor 2016.236. The QUIKLOOK installation manual was also updated to reference QLUtilitySensor 2016.236. A new transmittal CD and Certificate of Conformance are included with this CSB.

Customer Action Required:

No action is required for QUIKLOOK systems or software. The QUIKLOOK FS Transmittal CD is being issued as a means to distribute the updated documentation. Utilities should update their records to reflect the documentation updates.
